

LIBYAN CLAIMS REGISTRATION PROCESS

FURTHER INFORMATION AND TERMS AND CONDITIONS

The process

The process of compensation for the loss of property, business and trading income as a result of the crisis in Libya is evolving.

Global Arbitration Litigation Services Ltd (the Company) has launched a claims management process in order to provide expert input to Claimants and also to pursue claims on behalf of groups of Claimants of similar type claims. Our experience in mass claims processing and in particular processes with aspects of international state responsibility or diplomatic protection rights indicates that claimant groups are more likely to be successful as a group than as individual claimants. We are also supported by specialist lawyers in the field.

We have selected specialist international lawyers in London, Washington and Paris to process claims on behalf of all nationalities (French, English and Arabic speaking).

The lawyers have knowledge of international claims processing, international law of reparation and political risk insurance.

Terms and conditions : Claims Mandate

The Company retains specialist legal advisers. Once you have entered into a contract for Claims management services with this Company (the Mandate), this Company will process your claim,

The fees charged by the Company will vary depending on the category of claim which you have and thus the type of service which you require. For instance if you have a claim for monies payable pursuant to a confirmed letter of credit for goods or services provided pre-sanctions, the work involved will be less time consuming than a claim for damages arising from a breach of say a construction contract in Libya or for confiscation losses. Our fee basis will depend on the complexity of the claim and the time and expertise involved. Your choice in fee basis will depend on the extent to which your cash flow will enable you to pay for the services provided in the usual way (that is an hourly / daily rate payable on a monthly basis in advance). If the current situation has had a

dramatic impact on your cash flow then you may prefer to pay for the service by reference to a percentage of recovered funds. Alternatively, you may wish to choose a blend. The choice is a commercial decision which we are happy to discuss and which should reflect both the complexity of the claim and the required assistance. Where we enter an agreement which is based on a pure contingent fee, we will require a commitment to contract with us for at least 12 months.

Registration

We are asking that all potential Claimants register their claim(s) on the website. We will then send out a document request and a request for payment of the registration fee of £350.00 (plus VAT where applicable). Once the registration fee is paid and the further information/documentation received by us we will then review the material with a view to entering into a Claims Mandate with you, having identified the type of claim(s) and the complexity involved.

Registration and provision to us of documentation on your claim will allow us to identify the most cost effective route for your claim, whether as an individual Claimant or as part of a group based on type of claim or indeed nationality of Claimant(s).
